

CUSTOM INCENTIVES FOR YOUR BUSINESS

Have a unique energy efficiency project in mind? Custom incentives are available for new construction, retrofits, building upgrades, process improvements and more. The PPL Electric Business Energy Efficiency Program team will conduct a walkthrough of your facility to identify opportunities and determine eligibility.

Benefits

- Offset upgrade cost and reduce payback time.
- Lower maintenance costs — upgrading your facility can help prevent unexpected breakdowns and reduce repairs.
- Improve work environment and productivity by increasing comfort and safety.

Custom incentives may be available for:

- Building control systems that are not required by code (e.g., demand control ventilation or exhaust air heat recovery)
- Compressed air system upgrades
- Economizers
- Energy management system installation
- Industrial process upgrades
- New construction or renovation projects that involve multiple building systems and exceed state energy codes (e.g., lighting, HVAC and building envelope codes)
- Water/wastewater system improvements
- Building Operator Certification (courses must be taken through Penn College)

Begin your project

Identify your custom project or reach out to our program team to determine eligibility for a custom energy efficiency incentive.

Submit an incentive application through the online portal. Pre-approval is recommended.

Install your equipment. A post-on-site verification visit may be required.

Submit all required documentation.

Receive your incentive check.

Visit ppllectric.com/custom for full program details.
